Tutorial all about text effects for powerpoint

This tutorial is more of a demonstration of what text effects can be achieved just by using the standard powerpoint 97 / 2000 wipes.
It's great for:

- Exhibition stand graphics to attract visitors
- Conference openers (especially good with music)
- Conference breakout screens
- Divider or section headers in presentations
- General presentation ideas
- **FREE** Downloadable files available (see below)

Theory:

Theory? There is no theory to this tutorial just imagination!

Just download the sample file below, load the presentation into powerpoint and display it as a slideshow

Then if you like what you see just press the "Esc" key to stop the presentation. Go to a particular page and just see how we have done it. Then copy and paste the text into your own presentations.

To download the files for this tutorial right click the image below, then choose "Save target as" (IE), or "Save Link As" (Netscape).

Background

- The file downloaded is a Zipped file which will need unzipping.

- It contains only a powerpoint file and a readme.txt file
- Filesize 0.6mb

Clever Tricks:

We have only used one trick that is not available in the standard powerpoint package. See if you can spot it. We're not going to tell you how we achieved this!

The following assumptions where made for this tutorial:

- You are using powerpoint 97 or above.
- This tutorial is best for "on-screen" presentations and not printed presentations
- The same effects work if you are projecting your presentations using an LCD Projector
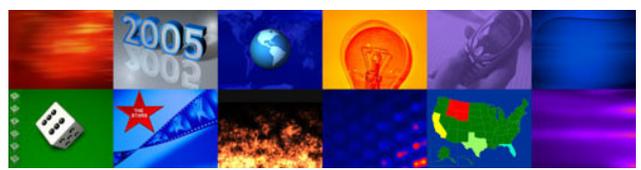

Kudos:

Here's some of the words people have used after seeing this text fx presentation

Cool, Wow!!!, Wicked, Magic, VERY cool, I loved the whole thing, I got lot of "oohs" and "ahhhhs".

Have Fun!
